SHORT NOTE

Having 4 years of expertise in React with excellent fluency in other web technologies. Seeking an opportunity to contribute a diverse skill set and fresh ideas to think outside the box, discovering unique solutions. I aim to realistically and with integrity develop software for a well-established business with a loyal clientele. A cooperative and dependable team member with exceptional technical skills.

SKILLS

Programming: JavaScript, HTML5, CSS3.

Libraries: React JS, Styled Components, React-Formik, Lodash, React-Router, React-Redux.

Framework: Ant Design.

Version Control: GIT.

Tools: Visual Studio Code, Bitbucket, Postman, Swagger Editor.

Operating Systems: Windows, Linux(Basic), Mac OS X(Basic).

Office Automation: Microsoft Pack Office(Word, Excel, PowerPoint).

PROJECTS

Multi-Lingual Website | *React, Ant Design, Jira, RESTful API's, GIT, React-Formik* February 2022 – Present

- 3 years of experience in Software development and implementation of web applications using **React, JavaScript, Ant Design, HTML5, CSS3** etc.
- Developed custom UI components and reusable components wrapped around the **Ant Design component library**.
- Built responsive and user-friendly web applications.
- Integrated **RESTful APIs** into React applications using **Postman and Swagger Editor** files from the backend team.
- Collaborated with **XD designers** to ensure responsive designs and optimal user experiences.
- Developed multi-lingual websites supporting English and Arabic languages.
- Used **Git for version control** and team collaboration.
- Familiar with Agile methodologies and worked with **AEM developers on static and dynamic web pages**.
- Managed workflows, defect logging, reporting, and tracking using **Jira**.

Single Page Application (SPA) | *React, Styled Components, React-Router, React-Redux, Lodash.* 2021 – Feb 2022

- Developed a Single Page Application for internal ticket tracking for the support team.
- Implemented React-Redux for state management, ensuring data persistence across the application.
- Enhanced UX by tracking employee project details with monthly records.
- Utilized React-Router for a multi-page effect without page reloads.

EXPERIENCE

React Senior Front-End Developer | *System Engineer* February 2022 – Present

Played a key role in the development of optimized and crucial web pages.

React Front-End Support | *Assistant System Engineer* 2021 – February 2022

Contributed to the codebase and learned various scenarios in React.

EDUCATION

Bachelor of Technology (Maharaj Vijayaram Gajapathi Raj College of Engineering) June 2020
Computer science and engineering (CSE) *Current GPA: 7.1/10.0*

Diploma (Sanketika Polytechnic College) June 2017
GPA: 7.5/10.0
