Short Note

Having 4.6 plus years of expertise in React with excellent fluency in other web technologies. Seeking an opportunity to contribute a diverse skill set and fresh ideas to think outside the box, discovering unique solutions. I aim to realistically and with integrity develop software for a well-established business with a loyal clientele. A cooperative and dependable team member with exceptional technical skills.

Technical Skills

Frontend: React.js, Redux Toolkit, React Router, Tailwind CSS, Ant Design, Formik, Styled Components, SCSS, JavaScript, HTML, CSS, Lodash, i18
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Middleware, Nodemailer.
Database: MongoDB Atlas, Mongoose, Aggregation, Data Modeling.
Tools And Utilities: Visual Studio Code, Bitbucket, Postman, Swagger Editor, Git, GitHub, Chrome DevTools, Jira.

Projects

Full Stack MERN Applications (Jawwy Project) | *React.js, Node.js, Express.js, MongoDB*   Feb 2025 – Present
- Over 6 plus months of experience in developing and implementing responsive web applications using **React.js, Node.js, Express.js, MongoDB, and modern UI libraries**.
- Built reusable UI components and dynamic dashboards using **Ant Design, Tailwind CSS, and styled-components** with full light/dark theme support.
- Developed **secure authentication systems** with JWT tokens and HttpOnly cookies, enabling role-based access control for users and admins.
- Created an **Admin Approval System** where new user registrations trigger **email and SMS notifications** using Nodemailer and Twilio APIs.
- Implemented **image upload and storage** features using Multer, displaying user profile images dynamically on the admin dashboard.
- Designed a **Bi-lingual website** supporting English and Arabic, ensuring complete RTL layout compatibility and language toggling.
- Integrated RESTful APIs with **Axios and Redux Toolkit Query**, improving API performance and caching efficiency.
- Built a **Project Dashboard** with infinite scrolling, debounced search (using Lodash), and responsive 4×4 grid card layout for large datasets.
- Collaborated with **UX designers** to ensure accessibility and high-quality design implementation across all viewports.
- Followed Agile methodologies, managed sprints, and tracked issues through **Jira and Git version control**.
- Deployed full-stack projects using **Vercel (frontend)** and **Render (backend)** integrated with MongoDB Atlas for database management.

Bi-Lingual Website (STC Project) | *React, Ant Design, Jira, RESTful API's, GIT, React-Formik*   2022 – Feb 2025
- 3 years of experience in Software development and implementation of web applications using **React, JavaScript, Ant Design,HTML5, CSS3 etc**.
- Developed custom UI components and reusable components wrapped around **the Ant Design component library**.
- Built responsive and user-friendly web applications.
- Integrated **RESTful APIs** into React applications using **Postman and Swagger Editor files** from the backend team.
- Collaborated with **XD designers** to ensure responsive designs and optimal user experiences.
- Developed Bi-lingual websites supporting English and Arabic languages.
- Used **Git for version control** and team collaboration.

- Familiar with Agile methodologies and worked with **AEM developers on static and dynamic web pages**.
- Managed workflows, defect logging, reporting, and tracking using **Jira**.

Single Page Application (Pepsico project) | *React, Styled Components, React-Router, React-Redux, Lodash.*2021 – Feb 2022

- Developed a Single Page Application for internal ticket tracking for the support team.
- Implemented React-Redux for state management, ensuring data persistence across the application.
- Enhanced UX by tracking employee project details with monthly records.

EXPERIENCE

React Senior Front-End Developer | *System Engineer*   February 2022 – Present
Played a key role in the development of optimized and crucial web pages.

React Front-End Support | *Assistant System Engineer*   2021 – February 2022
Contributed to the codebase and learned various scenarios in React.

EDUCATION

Bachelor of Technology (Maharaj Vijayaram Gajapathi Raj College of Engineering)   June 2020
Computer Science and Engineering (CSE)   *Current GPA: 7.1/10.0*

Diploma (Sanketika Polytechnic College)   June 2017
                                                                                            GPA: 7.5/10.0
